

VERSION WITH MARKINGS TO SHOW CHANGES MADEIN THE CLAIMS:

Please cancel Claims 1, 2, 3, 6, 9 10, 12, and 14 without prejudice or disclaimer of the subject matter contained therein and amend Claims 4, 7, 11, 13, 15, 17, and 18 as follows:

1. (Canceled) An activity wipe dispenser for dispensing wipes, the dispenser comprising:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and

a disposal chamber for receiving used wipes.

2. (Canceled) An activity wipe dispenser according to Claim 1, further comprising attachment means for attaching the container to disparate articles.

3. (Canceled) An activity wipe dispenser according to Claim 1, wherein the container comprises a hollow cylinder.

4. (Currently Amended) An activity wipe dispenser according to Claim [3] 7, wherein the cylinder is semi-rigid and manufactured from plastic materials

5. (Original) An activity wipe dispenser according to Claim 4, wherein the plastic materials include at least one of polyethylene and polypropylene.

6. (Canceled) An activity wipe dispenser according to Claim 1, wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipes.

7. (Currently Amended) An activity wipe dispenser {according to Claim 1,} for dispensing wipes, the dispenser comprising:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and

a disposal chamber for receiving used wipes
wherein the wipes comprise a continuous roll of sheet
material having perforations which separate individual wipes; and

wherein the container is a hollow cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed bottom of the container and having latching means for latching an unhinged side of the cylinder at the closed bottom of the container.

8. (Original) An activity wipe dispenser according to Claim 7, wherein the hollow cylinder of the disposal chamber has flexible and resilient, spaced ribs that span a width of the cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the disposal chamber.

9. (Canceled) An activity wipe dispenser according to Claim 1, wherein the disposal chamber comprises a bag attached to the container.

10. (Canceled) An activity wipe dispenser according to Claim 1, wherein the container is a cylinder and the disposal chamber is formed by a complementary telescoping hollow cylinder which slides over the sides of the container at the closed bottom of the container to form an expandable disposal chamber space, the telescoping cylinder having a disposal port through which used wipes are placed into the disposal chamber space.

11. (Currently Amended) A multi-pack arrangement of activity wipe dispensers comprising:

a plurality of activity wipe dispensers, each activity wipe dispenser comprises:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and
attachment means for attaching the container to disparate articles; and

a packaging retainer for holding the plurality of activity

wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipe; and

wherein each activity wipe dispenser contains wipes with a different and complementary active component particularly useful in connection with different aspects of a specific activity, each activity wipe dispenser having a disposal chamber for receiving used wipes.

12. (Canceled) A multi-pack arrangement according to Claim 11, wherein each activity wipe dispenser further comprises:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and

attachment means for attaching the container to disparate articles.

13. (Currently Amended). A multi-pack arrangement according to Claim [12] 11, wherein the container comprises a hollow cylinder.

14. (Canceled) A multi-pack arrangement according to Claim 12, wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipes.

15. (Currently Amended) A multi-pack arrangement [according to Claim 12,] of activity wipe dispensers:

wherein each activity wipe dispenser contains wipes with a different and complementary active component particularly useful in connection with different aspects of a specific activity, each activity wipe dispenser having a disposal chamber for receiving used wipes;

wherein each activity wipe dispenser further comprises:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and

attachment means for attaching the container to disparate

wherein the container is a hollow cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed bottom of the container and having latching means for latching an unhinged side of the cylinder at the closed bottom of the container.

16. (Original) A multi-pack arrangement according to Claim 15, wherein the hollow cylinder of the disposal chamber has flexible and resilient, spaced ribs that span a width of the cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the disposal chamber.

17. ^{currently} (Amended) A multi-pack arrangement according to Claim [12] 11, wherein the disposal chamber comprises a bag attached to the container.

18. ^{currently} (Amended) A multi-pack arrangement according to Claim [12] 11, wherein the container is a cylinder and the disposal chamber is formed by a complementary telescoping hollow cylinder which slides over the sides of the container at the closed bottom of the container to form an expandable disposal chamber space, the telescoping cylinder having a disposal port through which used wipes are placed into the disposal chamber space.

19. (Original) A multi-pack arrangement according to Claim 11, wherein the specific activity comprises one of: boating, camping, sporting events, hunting, tennis, golf, auto care, home care, backpacking, cycling, skiing, child care, patient care, custodial work activities and fishing.

20. (Original) A multi-pack arrangement according to Claim 19, wherein the active ingredients comprise two or more of the following: suntan lotion, sunscreen, insect repellent, deodorants, surface cleaning solutions, vinyl treatment solutions for extending the life of a vinyl surface, glass cleaning solutions, scented solutions, gun oil, shaving lotion, lubricants, paste wax, polish, furniture oil, skin lotion, anti-
